# RAGUSA, ITALY

The first meeting with our visitors friends!

The day of the presentation. Sweet, excited and happy at the same time!

What a wonderful surprise!

After the presentation... a nice photo with the beautiful ITALIAN girls!

A great picture with our lovely friends from Portugal!

A warm but lovely one with the creative Spanish friends!

What a beautiful day in the sunny Ragusa!

In front of Duomo di San Giovanni, showing the amazing Italian architecture (wow)

Chiesa del Regolaro - what an amazing building!

A view of Ragusa Ibla - the old part of the town, full of interesting places...

In front of the fountain of Santa Agnese!

The main street of Ragusa Ibla - isn't it 'bellissima'?

Another great example of the fine Italian art!

The breathtaking Mediterranean sea!!!

First night and give me a big hug!

One of our favorite photos - back to Ragusa Ibla, which has provided us with the best of both worlds!

The delicious Ragusa cheese - Formaggi!

A magnificent Gothic building - the castle D'Alagona!

Castle of San Pietro - amazing!

A typical column of an Italian classical building!

Back to Ragusa Ibla - the old part of the town, full of interesting places...

# COMENIUS CORNER

## Escola Secundária com 3.º ciclo do Ensino Básico de José Gomes Ferreira - Lisboa - PORTUGAL

The school is situated in Lisbon, and the students come essentially from families with an average income. It is one of the recognized schools in the country with quality education as part of the public schools for better ranking results in national examinations. It is a general secondary school which provides extensive learning in Literature, History and Art. There are several departments: Drama classes, ICT and Multimedia, Economics and Mathematics, Art, Social Studies. About 1800 students study here.

In this partnership of schools, we intend to develop new processes and improve education, the experiences exchanged.

We will participate in the project with many students actively. Our school will create Comenius Recipe Book and calendars for each year with the pictures of the project visits.

## Liceo Scientifico "E. Fermi" Ragusa - ITALY Sicilia

Liceo Scientifico "E. Fermi" is a public secondary school. It is in Ragusa, Sicily. It is a secondary school that provides extensive education in the field of Science, Mathematics, Chemistry, Music and ICT. The main subjects are English, French, Chemistry, Informatics and Physics.

The city is located in a disadvantaged area a bit difficult to reach, because the nearest airport (Catania) is 110 kms far, there isn't a good railway. Though all this difficulties the school has participated to several Comenius projects both as coordinator and partner. Students belong to different social classes, all of them study English and just a few students study French or Spanish as a second foreign language.

## IES SON PAGES Palma - SPAIN

The IES Son Pages (Secondary School) is situated on the outskirts of Palma on the island of Mallorca. The school teaches compulsory education courses as well as higher education ones (Baccalaureate level). The school is a pioneer in CLIL teaching (Technology in English) and has been successfully giving a wide all-inclusive range of students this type of learning skills since 2003 which is the date the Island Government started the project.

It has over 700 students who come from nearby towns and the outskirts of the capital as well as having a good welcoming system for students from different countries who immigrate to the island.

The students mainly come from middle class families most of which work in the services sector while the rest hold down jobs in other sectors.

We have successfully participated in other Comenius Projects, both in English and French, and our school starts next year to teach the International Baccalaureate Curriculum, which will make us the first state school to teach this programme in the Balearic Islands.

The school has also won a prize in the contest Euroscuola, where our students had the opportunity to visit the European Parliament in Brussels. Our school is easy to reach since it is situated in the main city of the Islands.

## PMG "Ivan Vazov" Dimitrovgrad - BULGARIA

The full name of our school is Mathematics and Science High School (PMG) "Ivan Vazov". The school is located in the centre of Bulgarian town Dimitrovgrad. It is a municipal secondary school providing extensive education in the field of foreign languages, mathematics, informatics, IT and science. The age of our students is 12-19 years. We have classes that provide Primary education (5th - 7th class) for the talented students in the field of mathematics. PMG "Ivan Vazov" is a leading school in the region in introducing innovative ways and methods of teaching using the new technologies in the field of ICT.

Our town Dimitrovgrad is situated in a region with various ethnic groups. This fact favours education of the students in the spirit of the universal human values: love of freedom, ethnic tolerance and respect for the rights of the others. About 80% of the teachers in the school are women.

Our students are working now with Bulgarian Foundation BGRF Gender examinations on a project connected with the violence over women.

## Grup Școlar Industrial "Nicolae Ciurcescu" Targoviste - ROMANIA

"Nicolae Ciurcescu" Industrial High School has a technical profile, offering training and qualifications for the following domains: Environment Protection, Information and Communication Technology, Electrical Engineering and Mechanics. The High School is situated in Targoviste, the ancient capital of Valachia. The 740 students, trained by over 40 teachers, come from families with high social risk (parents who went abroad for working, one parent families or families with no guaranteed minimum income). That is why school becomes an important support for these pupils for their life abilities development.

The participation at this project will offer students the possibility to enlarge their multicultural views, will motivate them for developing new abilities (ICT skills, for example), they could improve their foreign language knowledge, it is for their personal and career development.

## 2nd Vocational High School of Giannitsa - GREECE

The 2nd Vocational High School of Giannitsa was founded in 1984. It has four fields: Health and Welfare, Information Technology, Electronics and Applied Arts. Each year, approximately 300 students are enrolled and occupy 50 Art. In recent years the number of enrols are increasing. The school teachers teach both general education courses, and specialties. The theme of the project is about the Gender Role Inequalities and its impact on women. Our role as a partner school is to examine the 5 topics in the project for our culture and country.

The Greek educational system continues to guide young women to study and occupations that are characterized as typically female, regardless of the demands they have on the labor market.

We hope that this Comenius project will help to improve understanding of gender equality and gender mainstreaming at European level.

## Batıkent Seyket Evliyagil Ticaret Meslek Lisesi - Ankara TURKEY

It is a vocational school of commerce and communication located in the centre of Ankara, the capital of Turkey. The school has a capacity of 1200 students, 100 staff, a library, laboratories, a gymnasium, a big conference hall which is unique in that region. The departments of the school are information technology, accounting and financing, journalism, marketing and retail, office management and secretariatship. The purpose of the school is to develop responsible graduates who are academically, technically and vocationally competent and prepared for the future. The students are aged between 14-18 and after graduation if they are qualified, they can have a chance to go to university. The school doesn't have ethnic minorities or foreign students. Almost all the students are muslims. The number of women and men teacher is practically equal. Less than 1 % of the students are with disabilities.

This project will give our students a chance to learn about other cultures, their way of life, they will compare themselves with their peers and widen their abilities of teamwork through this project. The participants of the project will be more conscious about gender roles in different cultures and how people from different societies can overcome the difficulties of sex segregation.

# Gender Inequality

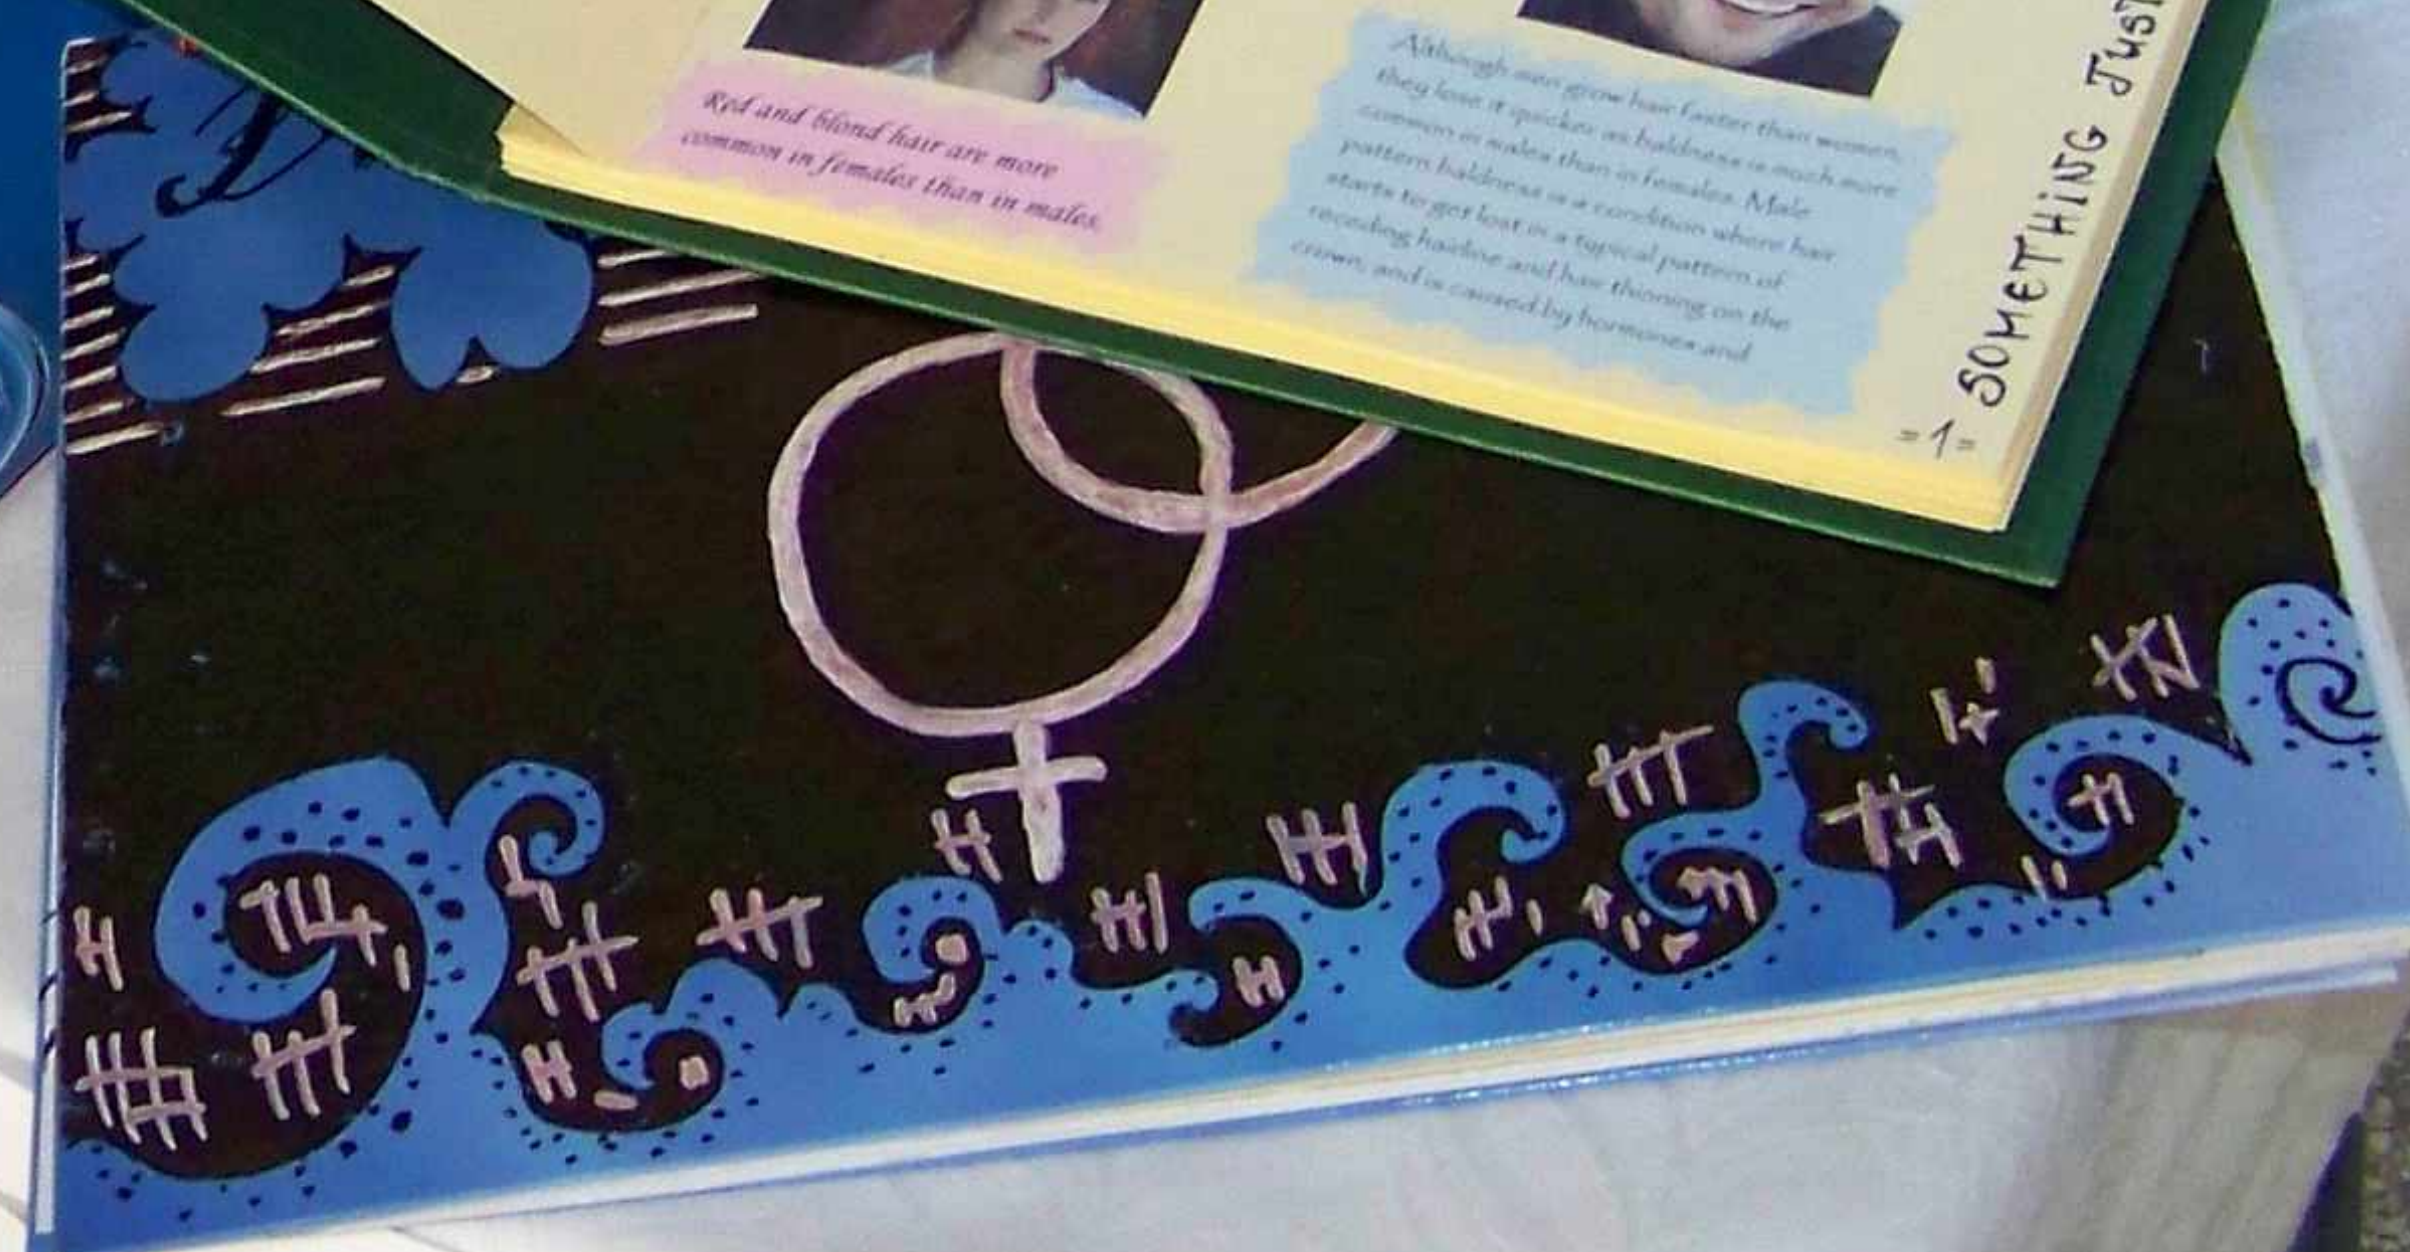

## Biological Differences Between Sexes

### BIOLOGICAL DIFFERENCES BETWEEN MEN AND WOMEN

MEN

Women

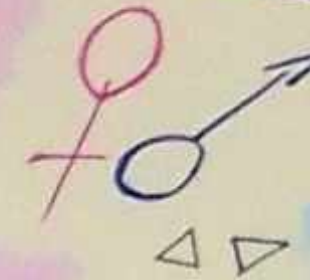

- Women
- Smaller waist than men
  - Less body hair
  - Wider hips
  - Enlarged breasts

The skin of females is warmer on average than that of males. The skin of males is also slightly darker.

Red and blond hair are more common in females than in males.

- Men
- Facial hair
  - Adam's apple and deeper voice
  - Shoulders wider than hips
  - Larger skull and bone structure

Although men grow hair faster than women, they lose it quicker on baldness is much more common in males than in females. Male pattern baldness is a condition where hair starts to get lost in a condition where hair receding hairline and hair thinning on the crown and is caused by hormones and
